Passionate and solutions-driven full stack web developer with a Web Development Certificate from the University of Wisconsin Extended Campus Coding Bootcamp. Experience in FullStack Web Development and UI/UX design utilizing a combination of strong communication, collaboration, problem-solving, and analytical skills. Strong ability to design, build, and maintain websites from conception to production. Ability to work in a fast-paced and diverse team environment developing solutions and exceeding expectations.

Projects

BrewBer| Front-End, Contact and Styling

- The purpose of this project was to create a website that would help people who are new to a city find local breweries and pubs that they could go to to meet new people.
- I was in charge of the UI and styling as well as the contact page for all of the people working on this project, as well as helping utilize the google maps api to show breweries in the area searched.

Nerd-Talk | Backend, Routing, and account/post management

- The purpose of this app was to create a small scale social media app where users could talk to and meet other developers who were working on similar projects
- Using Rest i created all of the routing and post/account Logic to create a site where users could add friends and make posts to a social media platform to connect with other developers.
